Oskar Bernberg

Full-stack TypeScript and React developer

I have over 11 years of experience building high-performance web applications and extensive expertise in leadership roles. Proven ability to guide teams, optimize development processes, and deliver scalable solutions across diverse industries. Adept at aligning technology with business goals to drive growth and efficiency, with a strong focus on innovation and results.

I'm always looking for new ways to challenge myself, trying to create stuff i always thought of as incredible and/or impossible. I really enjoy designing and building things from the ground up. That way I actually learn how most setups really work. Of course I continuously run into small hurdles along my way of achieving what I thought was impossible, but as always, spending some time on Google gives me the answers and leaves me with more experience. I'm a problem solver by heart and will always love taking on new challenges.

Roles:

Engineering Manager
Full-stack Developer
Systems and Solution Architect

Years of experience:

11+ years

Education:

Aug 2009 - Aug 2014
Master in Engineering Physics

Languages:
